Company introduction

AGRI FOREST MACHINE CO.LTD

## AGRIMEC GRAIN DRYERS

Italian producer of grain dryers since 1968. We introduced multiple machines to farmers and the National Agricultural Research Institute of Japan due to the **advantages** over Japanese dryers.

Drying speed

Highly reduced consumptions

Great robustness and reliability over time

Easy maintenance

Quick changeover from drying one type of grain to another

**MAZZOTTI**  
BY JOHN DEERE

The compact and light weight self-propelled sprayers from the Italian producer Mazzotti, a 100% subsidiary of John Deere, offer a high-tech crop treatment while keeping the impact on the soil to a minimum.

# Vegetable farming – potatoes & onions

The temperate climate makes Hokkaido the main area in Japan for growing vegetables. Due to this AGFM offers a wide variety of planting and harvesting machines from all over the world to support this important business.

The Italian transplanters from Ferrari not only provide an efficient planting but are also gentle to the seedlings.

Dewulf from Belgium offers all kinds of machines included in the growing process of potatoes, carrots and onions.

Box loading trailers from the English producer Larrington help making an easy connection between field and storage.

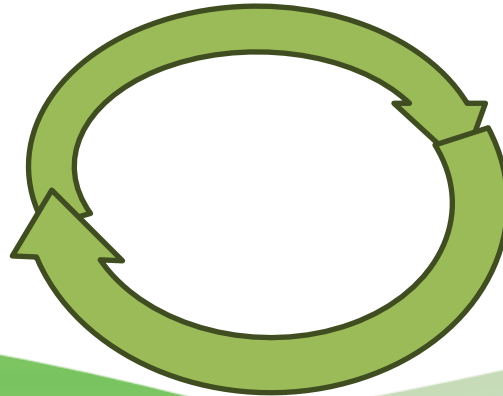

# Garlic farming

Growing garlic is a niche on Hokkaido. Since a garlic farmer interested in the Spanish garlic machine maker JJ Broch approached us several years ago we could offer parts of the complete system, from planting to grading and cleaning, to several other farmers as well.

Cleaning

The Canadian Nuhn Industries Ltd. is a leading manufacturer of liquid manure spreaders and other manure related equipment.

Magnus Quad Train

# Used machines

With several partners we offer a wide variety of new and used machines from all over the world in Japan.

The Croatian wholesaler BKL offers a large stock of agriculture machines from tillers and planters to harvesters.

# Used machines

**JOHN DEERE**

With partners in UK and Germany we can offer our japanese customers tractors and planters from John Deere.

# Our Forestry network in Japan

-  Forestry Tractor
-  Firewood Processor
-  Chipper
-  Other machines
-  Pfanner Japan

West-Japan

East-Japan

Together with the Austrian wood chipper maker MUSMAX we successfully introduced wood chippers to the growing Japanese biomass market. Started 10 years ago we now have over 30 machines in operation all over Japan.

Tractor driven wood chipper

Self-propelled crawler wood chipper

Additionally to the wood chippers we successfully introduced log splitting machines from the Austrian producer POSCH.

With this system customers from the forestry industry can easily produce and pack fire wood in different sizes.

Wood splitter „Spaltfix“

Wood splitter „Autosplit“

Wrapper „Packfix Hydro“

# Safety clothes

To round up our portfolio we partnered up with the Austrian safety clothes producer PFANNER. The positive feedback for the product led us to create Pfanner Japan as an own brand to keep the success going.

The safety clothes from Pfanner are now not only popular with single customers but are bought by forestry schools and associations as well.

# Safety clothes

Fully equipped by **PFANNER.**  
EINFACH. SICHER. LEBEN.

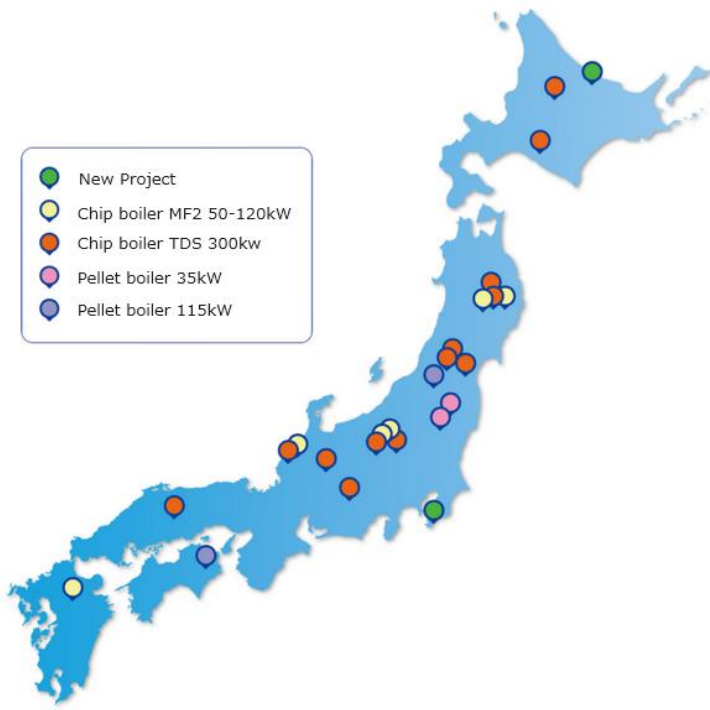

# Our wood biomass boiler partner in Japan

As we are involved in the forestry business our relationship with WBenergy came naturally. Since 2015 WBenergy is introducing biomass boilers from the Austrian producer KWB in Japan.

In 2022 more than 30 boilers are running successfully all over Japan helping to achieve Japans renewable energy goals.
